

Dear Parents,

We have explored and learned so many new concepts from our Balls study. Thank you for helping to make this time so enriching for the children! Throughout this study we built on the children's curiosity and learned how to ask questions and gather information to answer them. We explored different concepts, such as do all balls roll and bounce, who uses balls and what balls are made of. Through the use of our technology, we observed construction workers using wrecking balls and different athletes using balls to play sports, such as basketball, golf, baseball and bowling. We added some new words to our vocabulary such as, demolition, deflate, hollow, solid and circumference. This study has been filled with rich language and exploration. We are looking forward to what is to come next.

As this study comes-to-a-close, the children will celebrate their learning on March 30, 2021 by participating in hands-on sporting activities and relay races that will explore the different concepts we have learned about, such as throw, kick, bounce, roll and catch. We are really looking forward to a great celebration!

Ms. Michele and I are excited for our next study, Reduce, Reuse and Recycle, which will begin on April 12. We want to thank you for your continued support.

Thank you for your continued support!

Ms. Heather and Ms. Michele
